

AmeriWound delivers physician directed leading edge wound care treatment for LTC facilities. Our documented wound healing rates are significantly superior to virtually all LTC wound industry standards.

Physician Directed Treatment

Our **licensed team of Physicians** and Physician Extenders deliver **high quality wound care** in a cost-effective manner following MDS 3.0 clinical protocols. **Our wound care services are dependable, timely, efficient and effective.**

Dependability

Our physicians and physician extenders **coordinate with each facility's scheduling needs** and respond timely to your respective facility's wound care needs **enabling patients to heal sooner.**

Administrative and Billing Coordination

AmeriWound directly bills all of its services to Medicare Part B, Medicaid, managed care payers and/or private pay. We coordinate flexible patient scheduling to meet your facility's needs.

FOCUSED TREATMENT
FOCUSED SERVICES

What's In It For You

AmeriWound client facilities realize:

- Enhanced comprehensive wound care treatment and management
- Wound care treatment providers
- Significantly improved wound care healing times
- Improved wound care results
- Lower incidences of wound associated infections
- Reduced need to transfer patients to hospitals and wound care centers
- Fewer bed holds
- Increased patient/resident census
- Increased compliance with federal and state regulations
- Improved nursing facility wound care treatment scores
- Lower wound care associated costs

Choosing AmeriWound

AmeriWound's team of licensed clinical specialists will fully support and enhance your facility's goal of providing quality wound care for your residents. Our mission is to provide leading edge physician-directed wound care treatments to heal your residents' wounds in a cost effective and efficient manner.

By contracting with AmeriWound, your facility's residents will have access to a wide array of innovative treatment options based upon documented wound healing results. **Our documented wound days to healing results are vastly superior to LTC wound industry standards.** Accordingly, selecting AmeriWound as your facility's wound care treatment and management solution will lead to significantly improved wound healing results.

We work with your facility to accommodate virtually all nursing home and patient wound care needs. **Our providers utilize a wound focused EMR facilitating seamless, timely, MDS, and survey compliant documentation.**

Quality Assurance

AmeriWound has established a comprehensive wound focused quality assurance program measuring patient healing rates against national standards for all wounds that we treat and manage. Each provider's clinical results are documented and regularly measured as part of our continuous quality improvement program.
